Education

Santa Monica College | Computer Science Sep 2025 – Present
Dean's Honor List; CS Club; Alpha Gamma Sigma Honor Society.
Coursework: C++ Programming, Data Structures, Assembly Language; Linear Algebra (in progress).

University of Edinburgh | Computer Science Sep 2022 – Jul 2024
Certificate of Higher Education.
Coursework: Software Engineering, Object-Oriented Programming, Data Science, Discrete Mathematics and Probability.

Technical Skills

Languages: Python, TypeScript, Java, C++, Rust, SQL, Swift
Web & Backend: React, Next.js, FastAPI, PostgreSQL, SQLite, WebSockets, Vercel
AI/ML & Tools: Gemini API, scikit-learn, PyTorch, OpenCV, ANTLR4, JavaFX, Git/GitHub

Leadership & Experience

President | SMC Computer Science Club Sep 2026 – Present

- Lead a **20+ member** club with a seven-member board and two faculty advisors; run weekly in-person meetings.
- Organize a semester-long member project and plan a beginner GitHub workshop; plan a one-day hackathon for **30–50 students** with the Quantitative Finance and Entrepreneurship Club, including space/funding proposals.

Website Coordinator | SMC Alpha Gamma Sigma Honor Society Feb 2026 – Aug 2026

- Managed the website for a **200-member** chapter; refreshed outdated content and built advisor/outreach and committee-recruitment pages with online applications.
- Led a four-person UI/UX/development committee, assigning tasks and reviewing work; replaced unreliable email forwarding with Google Groups and documented setup for officers.

Website Developer | HackSMC Mar 2026 – Apr 2026

- Built the admin backend in a four-person website team: account management, applicant admit/reject workflows, and automated confirmation, password-reset, and decision emails through a **RabbitMQ** queue.
- Built draggable Solitaire-style sponsor cards in a Windows 95 theme using **Next.js**, **Supabase**, **microservices**.

Selected Technical Projects

Veru | AI Citation Verification | veru.app Dec 2025 – Present

- Built and deployed a Next.js/FastAPI citation-verification tool with streaming results; estimated **350–500 monthly users**.
- Match references with OpenAlex/Semantic Scholar and verify source support with Gemini. Placed **2nd** at SMC's Sharks' Valley pitch competition (May 2026).

Acadown | Academic Language & IDE | GitHub Aug 2025 – Present

- Built an ANTLR4 lexer/parser and Pandoc AST visitor for nested lists, citations, math, and PDF/LaTeX/Word export.
- Built a JavaFX IDE with syntax highlighting, PDF preview, and citation-style generation; released an MIT-licensed alpha on Zenodo.

Marketeer | Multimodal AI Marketing | GitHub Mar 2026

- Built parallel banner, Lyria music, Gemini TTS, and Veo video generation; implemented FFmpeg/WASM video-audio merging and resolved codec/CORS issues in a four-person team.
- Earned **Honorable Mention, Overall Track** at Build with Gemini (UCLA Glitch × Google DeepMind).

Doppel | Athletic Performance Prediction | GitHub Apr 2026

- Built a multi-output Random Forest model and FastAPI/SQLite prediction backend; wrote an Anchor smart contract for training proofs and NFT badges.
- Won the **Sports & Fitness Track** at BroncoHacks 2026 (Cal Poly Pomona).

Additional Recognition

Best AI/ML, HackCC Fall 2025 (RealiBuddy) | **Finalist**, Vision Hack: South LA 2026 (CivicSim).
Honorable Mention, Hackonomics 2026 (Village Economy) | **Finalist**, Vision Hack – Pi Day 2026.
